My Video Game Story

Last month, I decided to build my own video game. I downloaded a program called Scratch and started by creating a simple platform game. I learned how to design characters, add sound effects, and program actions. At first, it was tricky to make the character jump at the right time, but after some practice, I fixed the bugs. I asked my friends to test the game, and they gave me helpful feedback. Now, I'm working on the next level and even thinking about entering it in a school tech fair. Making a game taught me patience, creativity, and how to solve problems.
